

**Do you have a child
with a neuromuscular disorder like
Cerebral Palsy?**

**Would you like your child to reach
maximum potential and gain self confidence?**

Mind • Body • Motion

programs for higher achievement

Mind • Body • Motion programs are utilizing the philosophy and principles of Conductive Education (CE). CE is a system of education for individuals with cerebral palsy and other motor disorders of neurological origin. Our goal is to transform people with physical disabilities into active problem-solvers who use their cognitive abilities to practice and master everyday skills.

**As Mind • Body • Motion (MBM) celebrates the Grand Opening of its new facility in Langhorne, PA,
we are excited to offer:**

Intensive Conductive Education Programs

MBM's Intensive CE Programs run 4-5 days a week, 4-5 hours a day, depending on age and group dynamics.
Two (or more) weeks sessions are available between March 11, 2013 and April 19, 2013.

We are forming the following groups based on demand:

- Parents and Child Group (up to 4yrs)
- Early Childhood Group (up to 5yrs)
- Preschool Group (3yrs to Kindergarten)
- School Age Group (Kindergarten to 12yrs)
- Adolescent Group (12yrs & up)

An assessment by our conductors is required to determine if your child could benefit from CE. To make an appointment for a free consultation please, contact us. If, due to your location, you are not available for a personal assessment, please call us for instructions.

Out of state participants are welcome. Great accommodations and attractions are nearby.
Further information available upon request.

Intensive Programs are available regularly at MBM.

Call the center or check the website for future, similar events & various other services we offer.
